Name: Jeroen Brouwer

Title: Traffic Engineer

Email: Jeroen.brouwer@tomtom.com

Telephone: +31 (0) 20 75 75 441 and + 31 (0) 61 18 60 456

Address: TomTom International, De Ruyterkade 154, 1011 AC, Amsterdam, The Netherlands

PROFILE

As an enthusiastic traffic engineer I want to add value to the market of transportation and mobility. I enjoy working on difficult but challenging projects and products. I like working on planning, presenting and controlling projects and services.

WORK EXPERIENCE

Traffic Engineer - TomTom International – Amsterdam – October 2012

As PreSales Engineer within the Licensing GIS team I participate in- and support the team with customers enquiries, tenders and presentations. I help to explain customers in the governmental and geospatial market on the TomTom portfolio, write RFP and RFQ responses, analyze opportunities and represent TomTom on international events.

Sr. Application Technician - TomTom International – Amsterdam – 2010- September 2012

As Sr. Application Technician I was responsible for the application HD-Traffic. I was involved in the maintenance of the traffic information for the various countries in which the product is available, supporting the technical experts with incidents and contributing in projects around improving traffic information or launch it in new markets. Besides the technical involvements I performed presentations about traffic information for prospects and journalists, explaining how the traffic information is created and what the benefits of the service are. Besides the technical role I was also involved in making the Business Unit TomTom TechOps more efficient and transparent.

Traffic Engineer – Cyrus – Delft – 2009-2010

As a consultant for Cyrus I was working for the municipality Midden-Delfland as Traffic Engineer. I was involved in the various roles that a Traffic Engineer is working on. For example working on projects from the Province Zuid Holland, keeping the aldermen up-to-date, creating and defending traffic orders and to help the citizens of Midden-Delfland with traffic related problems and questions.

Report Analyst – TomTom International – Amsterdam – 2008-2009

As a Report Analyst I reported to management about various services, analyzing business cases, providing PR traffic related statistics and to give operational support for TomTom Traffic.

Intern – TomTom International – Amsterdam - 2008

I wrote my thesis during a traineeship for TomTom. The title of the report was “Future-proofing HD Traffic. Challenges imminent HD Traffic and ways to overcome them”. The survey was to make recommendations about how to make HD-Traffic more reliable and controllable.

Traffic Model Engineer – Grontmij – De Bilt – 2006-2008

After a traineeship at Grontmij I worked for Grontmij as Traffic Model Engineer. Grontmij is using the software Paramics to make microsimulation models about traffic. My role was to assist with the development of the traffic models.
